Welcome!

The feedback that we get after our yearly conferences is always very helpful. As usual, I am following suggestions and indications that were sent to me to create the 2019 event.

The Conference will be ever increasingly centred around: Science, Art, Technology and Innovations.

“Be like Leonardo” is our new statment and together with “Never Stop Learning” has become the basis on which we create the event.

This year the MBN Conference would like to follow Leonardo Da Vinci’s teachings and thoughts in honor of this great man. In addition to classic Masterclasses, Workshops, Keynotes lectures and Live Surgery, as well as Guest Lecturers on Art and Science, we decided to also add Surgical Technique sessions, limited to 30/40 people in a parallel room.

Hoping to have interpreted your wishes and your needs, I would be pleased to welcome all of you to Milano and to celebrate the Italian Master Leonardo Da Vinci after 500 years from his death during the congress.

Join us in Milano, the city of Art, Science, Techniques and Innovations.
